PCT International Application No.: PCT/EP2004/009536

VERIFICATION OF A TRANSLATION

I, the below named translator, hereby declare that:

My name and post office address are as stated below;

That I am knowledgeable in the German language in which the above identified International Application was filed, and that, to the best of my knowledge and belief, the English translation of the amended claims of the International Application No. PCT/EP2004/009536 is a true and complete translation of the above identified International Application as filed.

I hereby declare that all the statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the patent application issued thereon.

Date: February 15, 2006

Full name of the translator:

Dr. rer. nat. Tobias Ehnis

Post Office Address:

Dr. Gassner & Partner
Nägelsbachstr. 49 A
91052 Erlangen
Germany

New patent claims 1, 15 and 16

1. A body care product for application to skin and/or mucosa, in which porous particles which contain metallic silver, which are formed from metal and which have a mean diameter of between 1 and 100 μm are present.
15. The body care product as claimed in one of the preceding claims, wherein the body care product is a preparation which is, in particular, medicinally active, such as an emulsion, a lotion, a gel, a cream, an ointment, a healing ointment, a powder, a cosmetic, a skin protection cream or ointment, a disinfectant, a suspension, a soap, a synthetic surfactant, a bath additive, a peeling preparation, a face lotion, a tooth care product, a toothpaste, a mouthwash, a hair shampoo or a sun-screen agent.
16. The use of porous particles which contain metallic silver, which are formed from metal and which have a mean diameter of between 1 and 100 μm for producing a medicament, which is to be applied to skin and/or mucosa, for treating an inflammation and/or an infection in a mammal or human.
